

pathophysiology concepts of altered pdf

An altered level of consciousness is any measure of arousal other than normal. Level of consciousness (LOC) is a measurement of a person's arousability and responsiveness to stimuli from the environment. A mildly depressed level of consciousness or alertness may be classed as lethargy; someone in this state can be aroused with little difficulty. People who are obtunded have a more depressed ...

Altered level of consciousness - Wikipedia

General pathophysiological concepts. A state of consciousness is maintained by adequate cerebral blood flow. Cerebral vascular autoregulation ensures that the cerebral blood flow is kept within a narrow range, independent of the underlying systemic blood pressure.

The pathophysiology of common causes of syncope

Portal hypertension is hypertension (high blood pressure) in the hepatic portal system "made up of the portal vein and its branches, that drain from most of the intestine to the liver. Portal hypertension is defined as a hepatic venous pressure gradient. Cirrhosis (a form of chronic liver failure) is the most common cause of portal hypertension; other, less frequent causes are therefore ...
