Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Science Journal of Analytical Chemistry(SJAC) provides a forum for the publication of scientific research and review articles. The journal publishes original full-length research papers in all areas related to theoretical and objects analyzed applied aspects of analytical chemistry. General issues contain critical review articles, news, meeting reports, book reviews and meeting announcements.
