The case of double-type operators 76 The amplitude optimization problem 82 The general case 82 The case of a compact operator 84 The case of an isometric operator 85 Homogeneous optimization problems 86 Problems of energy concentration 86 Amplitude-phase optimization 86 Phase optimization 87 Maximization of the operator spectral radius 89 The ...

Phase Optimization Problems: Applications in Wave Field

Application: Phase Retrieval Problem The Phase Retrieval problem concerns recovering a signal given the modulus of its linear transform, e.g., the Fourier transform. It is important in many applications, e.g., X-ray crystallography ... Riemannian Optimization and its Application to Phase Retrieval Problem

This is the only book available in English language to consider inverse and optimization problems in which phase field distributions are used as optimizing functions. The mathematical technique used relates to nonlinear integral equations, with numerical methods developed and applied to concrete ...
