Philosophy of science is a sub-field of philosophy concerned with the foundations, methods, and implications of science. The central questions of this study concern what qualifies as science, the reliability of scientific theories, and the ultimate purpose of science. This discipline overlaps with metaphysics, ontology, and epistemology, for example, when it explores the relationship between ...

Naturalism is "the idea or belief that nothing exists beyond the natural world". It is the belief that "the natural world is the whole of reality". The term was first used this way in English in 1750. It is a kind of philosophy called metaphysical, because it covers everything: "nature is all there is, and all basic truths are truths of nature".. All the things and powers which are commonly ...
