In botany, succulent plants, also known as succulents, are plants that have some parts that are more than normally thickened and fleshy, usually to retain water in arid climates or soil conditions. The word "succulent" comes from the Latin word *sucus*, meaning juice, or sap. Succulent plants may store water in various structures, such as leaves and stems.

Climbing plants are plants which climb up trees and other tall objects. Many of them are vines whose stems twine round trees and branches. There are quite a number of other methods of climbing. The climbing habit has evolved many times. In most cases the climbing plants were more diverse (had more species) than their

non-climbing sister groups.. It is a key innovation which has been very ...
