CDC estimates 48 million people get sick, 128,000 are hospitalized, and 3,000 die from foodborne diseases each year in the United States.

## **Estimates of Foodborne Illness in the United States**

Survey questions should always be asked using local words and language. They showed that a number of illnesses (from four to eight), whose symptoms include loose/ frequent stools, are identified in the local language, and that these illnesses are labelled or diagnosed according to symptoms, causes or both.

A skin condition, also known as cutaneous condition, is any medical condition that affects the integumentary system—the organ system that encloses the body and includes skin, hair, nails, and related muscle and glands. The major function of this system is as a barrier against the external environment. Conditions of the human integumentary system constitute a broad spectrum of diseases, also ...
