prototyping, which uses on-line development tools, and evolutionary prototyping, which must be based on a sound software architecture. What is a prototype? We define a prototype as a concrete representation of part or all of an interactive system. A prototype is a tangible artifact, not an abstract description that requires interpretation.

2. RAPID PROTOTYPING Rapid Prototyping (RP) is represented by a range of technologies that are capable of taking virtual models created in CAD systems and fabricating them in a physical form. This process is done automatically, generally regardless of the model geometry, and without the need for special tooling or fixtures.
