### **Intelligent Query Tools for Querying and Reporting Beverly**

The use of SQL as the basis for most querying and reporting tools was both good and bad for data warehousing. On the positive side, many more product-to-product matchups are possible in data warehousing environments, enabling tools to be provided both by RDBMS vendors and other third-party vendors.

### **Querying and Reporting Tools for Data Warehousing - dummies**

The Difference Between Queries and Reports . A query is a question you define and send to the data source to retrieve the data. A report is an organized and formatted view of the data the query retrieved. The report does not have to include all of the data items you specify in the query.
