

### **radioactivity and pollution in pdf**

Environmental radioactivity is produced by radioactive materials in the human environment. While some radioisotopes, such as strontium-90 (90 Sr) and technetium-99 (99 Tc), are only found on Earth as a result of human activity, and some, like potassium-40 (40 K), are only present due to natural processes, a few isotopes, e.g. tritium (3 H), result from both natural processes and human activities.

Pollution is the introduction of contaminants into the natural environment that cause adverse change. Pollution can take the form of chemical substances or energy, such as noise, heat or light. Pollutants, the components of pollution, can be either foreign substances/energies or naturally occurring contaminants. Pollution is often classed as point source or nonpoint source pollution.

La pollution marine consiste en la présence de déchets dans les océans, ou bien suite du rejet

dans l'environnement par les activités humaines de quantités excessives de produits physiques ou chimiques toxiques, ou de déchets abandonnés par l'homme sur les sols, qui viennent polluer les fleuves et se retrouvent finalement dans les mers.. Cette pollution arrive dans le milieu marin ...
