So, there is a continuity of human life from a surplus cell which a human produces by the millions each day, to the pre-embryo. Theoretically, these stem cells can be used to develop into replacement organs (heart, liver, pancreas, skin, etc) Therapeutic cloning has not yet been accomplished in the laboratory or clinic.

Therapeutic cloning - How it is done; possible benefits

Conversion therapy is the pseudoscientific practice of trying to change an individual's sexual orientation from homosexual or bisexual to heterosexual using psychological or spiritual interventions. There is virtually no reliable evidence that sexual orientation can be changed and medical bodies warn that conversion therapy practices are ineffective and potentially harmful.

Conversion therapy - Wikipedia

The therapeutic index (TI; also referred to as therapeutic ratio) is a comparison of the amount of a therapeutic agent that causes the therapeutic effect to the amount that causes toxicity. The related terms therapeutic window or safety window refer to a range of doses which optimize between efficacy and toxicity, achieving the greatest therapeutic benefit without resulting in unacceptable ...
