The process of database refactoring is the evolutionary improvement of your database schema so as to improve your ability to support the new needs of your customers, support evolutionary software development, and to fix existing legacy database design problems.

### **Refactoring Databases: Evolutionary Database Design**

Database refactoring is a technique which supports evolutionary development processes. Collaboration between the data team and developers For years the norm for object developers was to work in an

evolutionary (iterative and incremental) manner but for database developers to work in a more serial manner.

### **Refactoring Databases**

Abstractâ€”The technique of database refactoring is all about applying disciplined and controlled techniques to change an existing database schema. The problem is to successfully create a Database Refactoring Framework for databases. This paper concentrates on the feasibility of adapting this concept to work as a generic template.
