REVIEW Dyscalculia: From Brain to Education

Various aspects of multilingualism have been studied in the field of neurology. These include the representation of different language systems in the brain, the effects of multilingualism on the brain's structural plasticity, aphasia in multilingual individuals, and bimodal bilinguals (people who can speak one sign language and one oral language).). Neurological studies of multilingualism are ...

Neuroscience of multilingualism - Wikipedia

A cortical homunculus is a distorted representation of the human body, based on a neurological "map" of the areas and proportions of the human brain dedicated to processing motor functions, or sensory functions, for different parts of the body. The word homunculus is Latin for "little man", and was a term used in alchemy and folklore long before scientific literature began using it.

Cortical homunculus - Wikipedia

Why do we think we're so bad at maths, when we're all - almost all - born with brain circuits specialised for numbers? Our ability to use numbers has been the key from taking us from the Stone Age to the Phone Age. Trade, science and technology would be impossible without this ability. Neuroscientist Brian Butterworth argues that we are all born with brain circuits specialised for numbers.

The Mathematical Brain: Selected Publications: 1975 - 2013

After you have identified various activities of the project and defined the sequence in which these activities should be carried out along with the due relationships existing among the activities, the next step is to draw a network diagram that is a graphical representation of the sequence you have identified for the activities.
