implicit beliefs to group conflict and communication, and discuss the underlying role of motivation and goal setting in these relationships (Fig. 1). We begin our analysis by introducing the implicit belief construct and review research conducted at the individual level and dyadic level linking these beliefs to negotiation and conflict resolution.

### **Research on Managing Groups and Teams**

Over the last 15 years, however, group and team research has become increasingly centered in the fields of organizational psychology and organizational behavior. Indeed, Levine and Moreland (1990) in their extensive review of small group research concluded that,

### **Work Groups and Teams in Organizations**

The fully updated 3rd edition of Leadership Team Coaching brings together the latest research in leadership teams and team coaching along with numerous examples to illustrate how to develop people from disparate groups into a high-performing team.

between teams and leadership processes (Kozlowski & Ilgen, 2006; Zaccaro, Rittman, & Marks, 2001). Third, perhaps as a result of the past application of traditional leadership models in team leadership research, extant research has also tended to focus primarily on formal team leadership structures (i.e., hierarchical, formally appointed leaders).

### **Leadership in Teams: A Functional Approach to**

In this paper, we review selected empirical studies on team learning from three research traditions: learning curves in operational settings (outcome improvement), psychological experiments on team member coordination of task knowledge (task mastery), and field research on learning processes in teams (group

process).
