Responsible research and innovation in information systems

Web 2.0, social networks, ubiquitous mobile computing and so on require a broader outlook by IS researchers (Baskerville, 2011 Baskerville R Individual information systems as a research arena European Journal of Information Systems 2011 203 251 254 10.1057/ejis.2011.8). Instead of just observing these technical and social developments, the IS community has the unique opportunity to participate in shaping them.

Broader federal oversight is needed to ensure that all people who take part in research studies, regardless of whether they are publicly or privately funded, have the same necessary protections for their health and well-being, says the report, Responsible Research: A Systems Approach to Protecting Research Participants.

Responsible Research: A Systems Approach to Protecting

In response to mounting concerns about the well-being of research participants and the ability of current approaches to ensure their protection, the Department of Health and Human Services commissioned the Institute of Medicine to perform a comprehensive assessment of the national system for providing research participant protection.

Responsible Research - NCBI Bookshelf

Responsible research and innovation (RRI) The concept of RRI is gaining currency in different disciplines. It represents the attempt to provide an answer to the multitude of ethical, moral, legal and other problems arising from the use of technology research and innovation (Von Schomberg, 2011).

ERASysAPP Workshop Responsible Research and Innovation, December 16/2014 2 Summary This workshop report contains an overview of the ERASysAPP plenary session Responsible Research and Innovation (RRI) in systems biology research at the international SB@NL2014 Systems Biology Symposium held in Maastricht (Dec 15 and 16, 2014).

D6.6: Symposium session Responsible Research and

Abstract. This paper explores the question of ethical governance for robotics and artificial intelligence (AI) systems. We outline a roadmapâ€”which links a number of elements, including ethics, standards, regulation, responsible research and innovation, and public engagementâ€”as a framework to guide ethical governance in robotics and AI.
