Mean annual volume increment of selected industrial species

Agroforestry is a land use management system in which trees or shrubs are grown around or among crops or pastureland. This intentional combination of agriculture and forestry has varied benefits, including increased biodiversity and reduced erosion. Agroforestry practices have been successful in sub-Saharan Africa and in parts of the United States.

Agroforestry - Wikipedia

Silviculture is the practice of controlling the establishment, growth, composition, health, and quality of forests to meet diverse needs and values.. The name comes from the Latin silvi-(forest) + culture (as in growing). The study of forests and woods is termed silvology.Silviculture also focuses on making sure that the treatment(s) of forest stands are used to preserve and to better their ...

What is an emissions return? An emissions return is a calculation of the changes in a forest's carbon stock during a certain period. This is based on how much carbon is stored in your forest. When do you have to complete an emissions return? If you have post-1989 forest registered in the ETS, you ...
