Retinal Diseases Signs In One Picture - Ophthalmology Notes

A systemic disease is one that affects a number of organs and tissues, or affects the body as a whole.

Systemic disease - Wikipedia

A disease is a particular abnormal condition that negatively affects the structure or function of part or all of an organism, and that is not due to any external injury. Diseases are often construed as medical conditions that are associated with specific symptoms and signs. A disease may be caused by external factors such as pathogens or by internal dysfunctions.

Parasites and Diseases in Alaska - by Disease, Alaska

Some Salmonella bacteria are resistant to antibiotics. Sometimes the bacteria that cause infections are resistant to the drug of choice, and this drug doesn't work. Physicians must then recommend second- or third-choice drugs for treatment, but these drugs might be less effective, more toxic, or more expensive.
