### **Slow Relaxations and nonequilibrium dynamics in condensed**

Abstract: The aim of these lectures, given at the Les Houches Summer School of Physics "Strongly Interacting Quantum Systems Out of Equilibrium", is providing an introduction to several important and interesting facets of out of equilibrium dynamics. In recent years, there has been a boost in the research on quantum systems out of equilibrium. If fifteen years ago hard condensed matter and ...

Abstract. Three lattice models which exhibit slow dynamics are reviewed, namely the kinetically-constrained Fredrickson-Andersen and Kob-Andersen models, and the ABC model which is a driven system exhibiting anomalously slow coarsening.
