In medieval times, small change was made from a mixture of equal parts of silver and copper. When the share of silver, or fineness, was low (markedly less than 50%), it was called billon.

Project MUSE - The Big Problem of Small Change

The Big Problem of Small Change offers the first credible and analytically sound explanation of how a problem that dogged monetary authorities for hundreds of years was finally solved. Two leading economists, Thomas Sargent and François Velde, examine the evolution of Western European economies through the lens of one of the classic problems of monetary history--the recurring scarcity and depreciation of small change.
