

smart structures applications and pdf

A smart grid is an electrical grid which includes a variety of operational and energy measures including smart meters, smart appliances, renewable energy resources, and energy efficient resources. Electronic power conditioning and control of the production and distribution of electricity are important aspects of the smart grid. Smart grid policy is organized in Europe as Smart Grid European ...

A shape-memory alloy (SMA, smart metal, memory metal, memory alloy, muscle wire, smart alloy) is an alloy that "remembers" its original shape and that when deformed returns to its pre-deformed shape when heated. This material is a lightweight, solid-state alternative to conventional actuators such as hydraulic, pneumatic, and motor-based systems. Shape-memory alloys have applications in ...

4 ICT-architecture: supporting daily life in three smart cities 1.3 Our stories The city of Groningen in the Netherlands is probably the most advanced among the Smart Cities partners in its introduction of architecture, so this publication leads with Groningen's story.

ICT architecture " supporting daily life in three smart cities

1. Introduction. The paradigm shifts from the realm of traditional desktop computing to an increasingly sophisticated computing (Gubbi, Buyya, Marusic, & Palaniswami, 2013) as well as the significant increase in connected devices and sensors have made feasible the vision for living in a smart environment. Several applications of a smart environment have been introduced recently, including smart ...

1. Introduction. The smart grid (SG) is conceived as an electric grid able to deliver electricity in a controlled, smart way from points of generation to consumers that are considered as an integral part of the SG since they can modify their purchasing patterns and behavior according to the received information, incentives and disincentives, , , .As confirmed by some recent research, , , most of ...

This section introduces a range of climate-smart agriculture (CSA) practices and technologies within seven entry points for CSA; soil management, crop management, water management, livestock management, forestry, fisheries and aquaculture, and energy management. Practices are understood broadly as ways of doing things, for example, precision farming, tillage, and fertilization; these are all ...

The Internet of Things (IoT) is defined as a paradigm in which objects equipped with sensors, actuators, and processors communicate with each other to serve a meaningful purpose. In this paper, we survey state-of-the-art methods, protocols, and applications in this new emerging area. This survey paper proposes a novel taxonomy for IoT technologies, highlights some of the most important ...
