

sociolinguistics and corpus linguistics pdf

Corpus linguistics is the study of language as expressed in corpora (bodies) of "real world" text. The text-corpus method is a digestive approach that derives a set of abstract rules that govern a natural language from texts in that language, and explores how that language relates to other languages. Originally derived manually, corpora now are automatically derived from source texts.

Variation is a characteristic of language: there is more than one way of saying the same thing. Speakers may vary pronunciation (), word choice (), or morphology and syntax (sometimes called "grammar"). But while the diversity of variation is great, there seem to be boundaries on variation – speakers do not generally make drastic alterations in sentence word order or use novel sounds that are ...
