In computer science, real-time computing (RTC), or reactive computing describes hardware and software systems subject to a "real-time constraint", for example from event to system response. Real-time programs must guarantee response within specified time constraints, often referred to as "deadlines". The correctness of these types of systems depends on their temporal aspects as well as their ...

ICMLSC 2019. ICMLSC 2019, The 3rd International Conference on Machine Learning and Soft Computing, will take place in Da Lat, Vietnam, from January 25-28, 2019. ICMLSC 2019 is co-organized by Sai Gon University, Vietnam and Industrial University of Ho Chi Minh City.

ICMLSC 2019 | Da Lat, Vietnam

A week ago I gave a talk with this title at a conference organised by the Smart Specialisation Hub. This organisation was set up to help regional authorities in developing their economic plans; given the importance of local industrial strategies in the government's overall industrial strategy its role becomes all the more important.

Soft Machines – Some personal views on nanotechnology

Processor design is the design engineering task of creating a processor, a component of computer hardware. It is a subfield of computer engineering (design, development and implementation) and electronics engineering (fabrication). The design process involves choosing an instruction set and a certain execution paradigm (e.g. VLIW or RISC) and results in a microarchitecture, which might be ...
