About these proceedings Introduction Much progress has been made in recent years in understanding the complex physics of polarized radiation in the sun and stars.

Solar Polarization | SpringerLink

The instrumental crosstalk associated with the Marshall Space Flight Center Vector Magnetograph and the solar crosstalk created by the magnetic field are described and their impact on the reconstruction of the solar vector magnetic field is analyzed.

Crosstalk in solar polarization measurements

The present volume gives a comprehensive and up-to-date account of this rapidly evolving and interdisciplinary field of science. It is based on the oral presentations given at the 2nd International Workshop on Solar Polarization held in Bangalore, India, in October 1998.

Whole disk solar polarization has been measured at the center of the Fe-line at 4872.14 angstroms and at H(beta) , using a tilt-scanning narrow-band (2 angstroms) interference filter, which show small variations that may be due to the movement of active regions across the solar disk.
