nonverbal medium for communication. Music is read differently in the brain than nonmusical tones and is connected to many different areas of the brain. Learning music relegates a larger part of the brain to recognizing and interpreting music. Listening to music has also been found to have an effect on learning.

The Effect of Music on the Human Body and Mind

might include producing an original work of music like a song or an instrumental composition, a visual work like a music video or a short film with original or pre-existing music or a creative research project exploring the science of music.

MUSIC IN SOCIETY, SCIENCE AND PSYCHE

peculiar nature of music itself. There are no external criteria for distinguishing between music and nonmusic, or between good music and bad music. Further, it is clear that how we perceive music depends at least to some extent on prior experience. Thus the relevance of psychological experimentation to music theory requires careful definition.
