This chapter discusses the stability of stochastic dynamical systems. New theorems on the Liapunov theory of stochastic stability are proved. These results are for the continuous-time case only. The chapter discusses the usefulness and potential of the method by a number of examples.

of the stochastic stability. The stability theory was introduced by R. Z. Khasminskii [4]. The basic principles of various types of stochastic systems are described by X.Mao [6]. In the paper we derived sufficient conditions for general system of the zero solution of the stochastic differential equation using Lyapunov function.
