Developments in Structural Adhesives . Introduction Characteristics required for a Structural adhesive - Durable for the lifetime of the timber structures (min 50 years) - Adhesive must not creep - Bonding mechanism stronger than the wood - Must comply with AS/NZS4364:2010 .

isolation functions. This paper will focus on structural adhesives which have the highest load-bearing capability amongst types of adhesives. Selecting a Structural Adhesive In choosing a structural adhesive, consultation with an expert (such as a technical engineer at a supplier or an outside consultant) is invaluable.
