Gender Studies is dedicated to the study of feminine, masculine and LGBT identity. An interdisciplinary approach is used for the study of gender and the intersection of gender with other categories of identity such as ethnicity, sexuality, class, and nationality.

Gender Studies | Modern & Classical Languages, Literatures

In lieu of an abstract, here is a brief excerpt of the content: HUMANITIES 85 which assumes significant differences between women and men and claims that one sex is superior to the other; and sex complementarity, which claims that women and men are significantly different and equal.

Nominative-accusative and ergative are two common alignment types found across languages. In the former type, the subject of an intransitive verb and the subject of a transitive verb are expressed the same way, and differently from the object of a transitive. In ergative languages, the subject of an intransitive and the object of a transitive appear in the same form, the absolutive, and the ...
