More evidence for evolution is offered by comparative anatomy (see Figure 12-1). As Darwin pointed out, the forelimbs of such animals as humans, porpoises, bats, and other creatures are strikingly similar, even though the forelimbs are used for different purposes (that is, lifting, swimming, and flying, respectively).

Understanding evolution is also central to the advancement of medicine. Indeed, the entire field of "evolutionary medicine" is devoted to using the principles of evolution to study and treat human illness and disease. Concepts such as adaptation and mutation inform therapies and strategies to combat pathogens, including influenza.

Why is it important to teach evolution

We study evolution for the same reasons that we study any subject " the thirst for knowledge, to understand the past and predict the future, and to organize our world. But the subject of evolution also has huge relevance to our world and current issues that concern all of us.
