Papers by Keogh and collaborators that use SAX. (in random order) In [1] we show how to use SAX to find time series discords which are unusual time series. In [2] we consider a special case of SAX, which has an alphabet size of 2, and a word size equal to the raw data, and show that we can use this bit-level representation for a variety of data mining tasks.

Artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and other animals. In computer science AI research is defined as the study of "intelligent agents": any device that perceives its environment and takes actions that maximize its chance of successfully achieving its goals.

Social cycle theories are among the earliest social theories in sociology. Unlike the theory of social evolutionism, which views the evolution of society and human history as progressing in some new, unique direction(s), sociological cycle theory argues that events and stages of society and history are generally repeating themselves in cycles. Such a theory does not necessarily imply that there ...

1.. Introduction In the last decade “systems of innovation”™ has emerged as a new topic on the research agenda of innovation studies. It has opened up a promising strand of study, in which the scope of analysis has been broadened from artefacts to systems, from individual organisations (often firms) to networks of organisations.
