The Department of Chemistry and Biochemistry has split into two separate departments.

Chemistry and Biochemistry | University of Colorado Boulder

Computational chemistry is a branch of chemistry that uses computer simulation to assist in solving chemical problems. It uses methods of theoretical chemistry, incorporated into efficient computer programs, to calculate the structures and properties of molecules and solids. It is necessary because, apart from relatively recent results concerning the hydrogen molecular ion (dihydrogen cation ...

Molecular biology / is a branch of biology that concerns the molecular basis of biological activity between biomolecules in the various systems of a cell, including the interactions between DNA, RNA, proteins and their biosynthesis, as well as the regulation of these interactions. Writing in Nature in 1961, William Astbury described molecular biology as:

This degree is delivered by the Departments of Chemistry, Mathematics and Physics, and focuses on work at the boundary of these three disciplines, for example nano-engineering. Graduates of this course will gain strengthened knowledge of the physical and mathematical background for mastering physical methods of modern chemistry.

Molecular Diagnostics -- Genetic & genomic testing

An exciting achievement in materials and polymer chemistry in recent decades is the ability to create large synthetic nanostructures with well-defined shapes and atomic structures in a rational and efficient manner.
