2 Hybrid Tense Logic Hybrid tense logic is a simple extension of ordinary Priorean tense logic which can refer to times. It can do so because it contains a collection of special propositional symbols called nominals. Nominals are true at one and only one time: they "name" the time they are true at.

doing, Meyer hopes to limit his metaphysical commitments to just the tense operators and axioms of a minimal tense logic|to temporal ideology alone. This trading of ontology for ideology is, for Meyer, the main attraction of his view: The advantage of the times-as-sets view is that it preserves the onto-logical frugality of tense primitivism.
