Attempts at standardized temperature measurement prior to the 17th century were crude at best. For instance in 170 AD, physician Claudius Galenus mixed equal portions of ice and boiling water to create a "neutral" temperature standard. The modern scientific field has its origins in the works by Florentine scientists in the 1600s including Galileo constructing devices able to measure relative ...

1-6 Part1: Hydrometer. Place fluid sample in a cylinder. Measure the API gravity at room temperature using the appropriate hydrometer. Make sure to follow the instructions of a hydrometer given in this chapter. Use controlled temperature baths to raise the temperature of the fluid sample and take four or five measurements at different temperatures.
