places. Indeed, there is no limit to the power of thought, because it is a spiritual power of intense potency. It is the power which distinguishes man from the brute, it is the power by which he can mount up to God, it is the power which can make the unsuccessful successful in the battle of life, it is the power which can make

influence of memory on thought and language. Ten years on, the role of knowledge stored in memory has moved to the centre of the stage. Mental representations of knowledge based on past experiences, and the mental processes which exploit knowledge in order to interpret and act in the world, are seen as central issues in psychology.

overall “education”. Consider all the memory-building that’s gone on before you ever thought about studying anything and reflect on the learning experiences that have contributed most to your understanding “of the world and of yourself. As you prepare to take a fresh approach to learning, think about the aspects of your memory

The second stage of information processing is the working or short-term memory. This stage is often viewed as active or conscious memory because it is the part of memory that is being actively processed while new information is being taken in. Short-term memory has a very limited capacity and unrehearsed information will begin
