Fact Sheet #10 Background Radiation Natural versus Man-Made Page 5 of 7 Medical Procedures Radiation used in medicine is the largest source of man-made radiation to which people in the United States are exposed.

### **Background Radiation Natural versus Man-Made**

In The Natural Background to Meaning Denkel argues that meaning in language is an outcome of the evolutionary development of forms of animal communication, and explains this process by naturalising the Locke-Grice approach.

### **The Natural Background of Meaning | A. Denkel | Springer**

Current natural background assessment and listing process: Currently all credible chemical data are compiled and assessed on a biennial basis to determine if waterbodies are meeting designated uses (figure 1).

### **Natural Background Guidance**

Background radiation is a constant source of ionizing radiation present in the environment and emitted from a variety of sources. According to the United Nations Scientific Committee on the Effects of Atomic Radiation

### **Fact Sheet: Natural Background Radiation**

Background Radiation Fact Sheet Adopted: June 2012 Revised: June 2015 ... can be seen, natural background radiation is the largest source of radiation exposure to humans (50 percent). However, medical ... age dose from natural background radiation of about 3.1 mSv. The various source components of this dose are

natural levels. Man-Made Radiation Ionising radiation is also generated in a range of medical, commercial and industrial activities. The most familiar and, in national terms, the largest of these sources of exposure is medical X-rays. A typical breakdown between natural background and artificial sources of radiation is shown in the pie chart.

### **What is Background Radiation? - World Nuclear Association**

reflection on "What are man's natural ends? Purpose?". Man discovers the content of natural law (the

relevant principles) by reference to the answers to these questions. The society that man lives in must be ordered in such a way to facilitate the realization of the content of natural law, thereby fulfilling man's purpose.

### **Classical Natural Law Theory - cfpcourseweb.com**

Gamma radiation emitted from natural sources (background radiation) is largely due to primordial radionuclides, mainly <sup>232</sup>Th and <sup>238</sup>U series, and their decay products, as well as <sup>40</sup>K, which exist at trace levels in the earth's crust. Their concentrations in soil, sands, and rocks depend on the local geology of each region in the world.
