example, paying a premium price-e.g., \$650 for a piece of Lalique crystal-is compensated for by having this exquisite work of art displayed in one's home. Other possible perceived benefits directly related to the price-value equation are status, convenience, the deal, brand, quality, choice, and so forth. Many of these benefits tend to overlap.

### **Chapter 5 Transfer Pricing Methods - United Nations**

Changes in supply or shifts in supply occur when one of the determinants of supply other than price changes. Examples: 1. The price of a factor of production rises. This would cause a leftward shift the supply curve. 2. A rise in the price of an alternative good that could be provided with the same resources. This implies a leftward shift of supply. 3.
