Quality of Light - southernlightingservices.com
In essence, the front lighting is similar to the quality of light that many portrait photographers use, namely front diffused lighting (i.e., butterfly lighting) to conceal wrinkles, pores, creases, and defects on the skin of the face. By concealing shadows and thus minimizing texture, the viewer interprets a softer and smoother surface.

The Quality of Light - Photography Life
Lighting quality is much more than just providing an appropriate quantity of light. Other factors that are potential contributors to lighting quality include e.g. illuminance uniformity, luminance distributions, light color characteristics and glare (Veitch and Newsham 1998).

Chapter 3: Lighting quality Topics covered
Quality of light for people photography. Quality of light is just as applicable to photography of people as well. While no hard and fast rule applies that says â€œalways do thisâ€• for portraits â€“ it is generally more flattering for your subject to use soft light.

Quality of Light â€“ What is it? How do you use it?
Acclaimed photographer Neil van Niekirk presents seven distinctly different lighting scenarios?available light, exposure metering, a touch of flash, bounced on-camera flash, off-camera flash, video light, and hard sunlight?to show readers how to manipulate the direction and quality of light, the subjectâ€™s and photographerâ€™s position, and ...

Direction & Quality Of Light PDF - bookslibland.net
Quality of light is usually determined by the physical size of the light source (not the intensity) as well as how soft or hard the shadows it produces. Thus, in general, the larger, more diffuse the light source, the softer the light quality.

The Quality of Light - Thorsten Overgaard
The light quality reaching the plant and the absorbing organs varies according to many factors. These include

the time of the day, season, geographic location, atmospheric gases and moisture, clouds, smoke, dust, and other pollutants in the air, topography, presence of barriers including other plants, plant architecture, and location of absorbing plant organs within the canopy.

Light Quality in Plant Growth and Development
At the end of light therapy intervention and during the four‑week follow‑up period, the global sleep quality scores were found to be higher compared with pre‑intervention and baseline scores ($p < 0.001$).

The effect of light therapy on the sleep quality of the
