

the respiratory system human pdf

The respiratory system (also respiratory apparatus, ventilatory system) is a biological system consisting of specific organs and structures used for gas exchange in animals and plants. The anatomy and physiology that make this happen varies greatly, depending on the size of the organism, the environment in which it lives and its evolutionary history.

Respiratory system - Wikipedia

The Respiratory System is vital to every human being. Without it, we would cease to live outside of the womb. Let us begin by taking a look at the structure of the respiratory system and how vital it is to life.

Human Physiology/The respiratory system - Wikibooks, open

Human respiratory syncytial virus (HRSV) is a syncytial virus that causes respiratory tract infections. It is a major cause of lower respiratory tract infections and hospital visits during infancy and childhood. A prophylactic medication, palivizumab, can be employed to prevent HRSV in preterm (under 35 weeks gestation) infants, infants with certain congenital heart defects (CHD) or ...

Highly pathogenic avian influenza (HPAI) H7N9 viruses have emerged and raised concerns of a pandemic. Imai et al. characterized an HPAI H7N9 virus isolated from a human. This virus transmitted among ferrets without prior adaptation and caused lethal infection in animals, demonstrating its pandemic potential and the need for surveillance.
