The broaden-and-build theory could be defined as a model for explaining the mechanisms behind positive emotions in our minds and bodies, what their effects are, what the evolutionary reason is behind them and why studying them is so important for our well-being.. Studying emotions has always been a challenge. There are different points of view as to what is considered an emotion.

Self-Determination Theory (SDT) is a theory of motivation.. It is concerned with supporting our natural or intrinsic tendencies to behave in effective and healthy ways. SDT has been researched and practiced by a network of researchers around the world.. The theory was initially developed by Edward L. Deci and Richard M. Ryan, and has been elaborated and refined by scholars from many countries.

Probability theory is the branch of mathematics concerned with probability. Although there are several different probability interpretations, probability theory treats the concept in a rigorous mathematical manner by expressing it through a set of axioms. Typically these axioms formalise probability in terms of a probability space, which assigns a measure taking values between 0 and 1, termed ...
