Transparent conducting films (TCFs) are thin films of optically transparent and electrically conductive material. They are an important component in a number of electronic devices including liquid-crystal displays, OLEDs, touchscreens and photovoltaics. While indium tin oxide (ITO) is the most widely used, alternatives include wider-spectrum transparent conductive oxides (TCOs), conductive ...

Film capacitors, plastic film capacitors, film dielectric capacitors, or polymer film capacitors, generically called "film caps" as well as power film capacitors, are electrical capacitors with an insulating plastic film as the dielectric, sometimes combined with paper as carrier of the electrodes.. The dielectric films, depending on the desired dielectric strength, are drawn in a special ...

High-rate pulsed laser deposition was applied to the preparation of thick LiCoO₂ cathode films, which were then used in the fabrication of thin-film batteries. The deposition rate of the LiCoO₂ films was 2.3 μm/h. The thin-film batteries showed an increase in capacity up to 470 μAh/cm² with increasing cathode film thickness. The rate dependence of discharge capacity was analyzed using a ...
