The remainder of this paper will focus on the injuries that can occur during oxygenation support of acute respiratory failure and then will revisit physiology of tissue hypoxia to reexamine what the goals for oxygenation and oxygen delivery might be in the future.

oxygenation therapy for acute stroke with intervention ranging from four hours to one week are in the literature. Work observation by Ingvar and Lassen (7) published the first report on the treatment of four stroke patients with hyperbaric oxygenation. The overall results showed a regression of EEG changes during treatment with hyperbaric oxygenation.

HYPERBARIC OXYGENATION IN THE ACUTE STROKE

The purpose of this presentation is to provide basic information about the operation and regulation of the cardiovascular and respiratory systems, as well as the properties of the blood and parenchymal cells, so that a fundamental understanding of the regulation of tissue oxygenation is achieved.
