

transgenic organisms biological and pdf

A genetically modified organism (GMO) is any organism whose genetic material has been altered using genetic engineering techniques (i.e., a genetically engineered organism). GMOs are used to produce many medications and genetically modified foods and are widely used in scientific research and the production of other goods. The term GMO is very close to the technical legal term, 'living ...

Genetically modified organism - Wikipedia

A transgene is a gene or genetic material that has been transferred naturally, or by any of a number of genetic engineering techniques from one organism to another. The introduction of a transgene (called "transgenesis") has the potential to change the phenotype of an organism. In its most precise usage, the term transgene describes a segment of DNA containing a gene sequence that has been ...

Transgene - Wikipedia
