Introduction to Urban Water Supply - The Open University

of urban water landscapes. Since one of the most important urban infra-structures, the water supply and sewage system, is a truly hidden, not visible structure in a strict material sense because they are underground and not a part of the "built landscape", this aspect of the confluence

Urban Water Systemsâ€”A Conceptual Framework

It is useful to distinguish between large-scale, formal water-supply systems (e.g. urban water-supply systems) and small-scale, scattered supplies. The distinction is not so much between urban and rural areas, as one based on the level of technology and the institutional arrangements for management, maintenance, and protection. Whether the

7. Water supply - World Health Organization

The seriousness of the challenges associated with urban water supply and sanitation in India have been recognised in recent times. After decades of neglect, the first national effort to invest in the urban water and sanitation sector commenced in the 1970s, but was accorded
