(ICT) Information & Communication Technologies | New

Information and communication technologies for development (ICT4D) refers to the application of information and communication technologies (ICT) toward social, economic, and political development, with a particular emphasis on helping poor and marginalized people and communities. It aims to help in international development by bridging the digital divide and providing equitable access to ...

Information and communication technologies for development

The World Wide Web (WWW), also called the Web, is an information space where documents and other web resources are identified by Uniform Resource Locators (URLs), interlinked by hypertext links, and accessible via the Internet. English scientist Tim Berners-Lee invented the World Wide Web in 1989. He wrote the first web browser in 1990 while employed at CERN near Geneva, Switzerland.

World Wide Web - Wikipedia

Vehicle-to-vehicle (V2V) communication enables vehicles to wirelessly exchange information about their speed, location, and heading. The technology behind V2V communication allows vehicles to broadcast and receive omni-directional messages (up to 10 times per second), creating a 360-degree "awareness" of other vehicles in proximity.

Roger Hudson, October 2005. By some estimates over 80% of the disabilities experienced by people in our communities are invisible to the wider population; so it is not surprising most website developers and proprietors believe that very few, if any, people with disabilities use the Web.

Disabilities and technologies (2005) | Web Usability

This article introduces the various protocols and technologies used in wide-area network (WAN)

environments. Topics summarized here include point-to-point links, circuit switching, packet switching, virtual circuits, dialup services, and WAN devices.
