Being sad is a normal reaction to difficult times in life. But usually, the sadness goes away with a little time. Depression is different—it is a medical condition that may cause severe symptoms that can affect how you feel, think, and handle daily activities like sleeping, eating, or working.

NIMH » Depression in Women: 5 Things You Should Know

The lives of women in China have significantly changed throughout reforms in the late Qing Dynasty, the Republican period, the Chinese Civil War, and rise of the People's Republic of China, which had announced publicly on the commitment toward gender equality. Efforts the new Communist government made toward gender equality were met with resistance in the historically male-dominated Chinese ...

Women's health in India can be examined in terms of multiple indicators, which vary by geography, socioeconomic standing and culture. To adequately improve the health of women in India multiple dimensions of wellbeing must be analysed in relation to global health averages and also in comparison to men in India. Health is an important factor that contributes to human wellbeing and economic growth.
